ELECTRICITY

Short term power supply lines

Reduced impact on local residents, parking demand, and the environment: in Munich, a temporary power connection can be obtained directly from the municipal utilities.

Vorteile

- Green Filming: EcoPower instead of Diesel
- immense CO2-reduction
- No noice polution
- keine exhaust emmissions
- Saving of space for the generator / battery pack
- Conflict avoidance: residents are not disturbed by generators

Infos

- since 2012 all short term SWM connections have been supplied with green electricity.
- Information sheet pricing at
  https://www.swm.de/geschaeftskunden/strom-dienstleistungen#kurzzeitveranstaltung
  - Kurzfassung: 63 A-connection: 335,- Euro net (Aug. 2026)
    125 A-connection: 440,- Euro net (Aug. 2026)
    if less than 5 days in advance: + 400,- Euro express surcharge
  - prices apply **per connection** not per day !

How to

There are likely some subjects and situations where it will not work logistically.
However, selecting the base location based on the available options makes sense.

- **Inquiries**: SWM is happy to provide further information, see below for contact details.
- **Scout / Tech-Recce**: Every SWM power box has a red OVK number; this is required for an inquiry.
- **Application**: Website SWM under via link below.
  NEW via online form. Not longer via pdf.

Experiences

- deutlich SWM´s work is significantly more easy with a fully completed form
- The exact adress of the base, set or transport fleet (also shown on an exact map) is helpful.
- Unfortunately there currenty no overview map. A pre check with the SWM via the red number on those boxes is helpful cause, some bus stops, e-mobiltity charger are supplied by those connection points.
